**Data security, usability and  
autonomy to choose the feature  
that best meets your business  
needs**

[www.pulsus.mobi](http://www.pulsus.mobi)

# The **best solution** for your customers to manage mobile devices.

Developed to offer high performance to businesses with mobile devices, Pulsus' technology offers **an intuitive and intelligent solution** that adapts to numerous business models.

**One in between the 10 global solutions** of EMM which has the Android Enterprise Recommended badge. 

## Flexible device management offers choice for you

### **Dedicated Device**

User will only have access to kiosk or launcher mode with configuration set by the company.

### **Work Only**

Fully managed device that user access standard interface of device, but with restrictions and configurations set by the company.

### **Personally enabled**

Company still has full device control, but with the possibility to create the division between personal and professional data with Work Profile.

### **Bring Your Own Device (BYOD)**

Provides a clear division between personal and professional data, preserving personal privacy while keeping control over work data on personal devices.

Founded in 2016, **Pulsus** has leading global companies as clients, benefiting from remote setup and administration of corporate devices **in a quick, easy and safe way.**

**+ 1000 customers worldwide**

**+ 900k managed mobile devices**

Invest in state-of-the-art software for your business and have a complete solution to overcome your challenges involving enterprise mobility.

## Check some features

### Geofence

Allows the setup of a geographic virtual fence capable of blocking the device usage when leaving or entering this delimited space.

### Device Inventory

Manage the amount of devices that are being used and check the employees responsible for using them. Also helps to prevent improper access to corporate data in the event of theft or robbery.

### Chrome OS

Management of devices with ChromeOS (Chromebooks) operational system through groups organization and hardware and software use policy application.

## Highlighted feature

### Signal Coverage Map

Public tool to visualize the level of signal coverage (5G, 4G, 3G, 2G) of mobile network operators.
